

WILD SIDE (AFRICA) LTD.

SAFARIS

When dreaming of Africa, one might imagine the lion chasing its prey, an elephant drinking from a watering hole, or a herd of giraffes grazing on the grasslands. Wild Side Africa wants to help you make those dreams a reality.

We will arrange a safari for you that will allow you to experience all that you want. Safaris run from one to five days and can be arranged for any area of Kenya. All safaris include a Kenyan driver/guide who is fluent in English, a well-maintained vehicle, a visit to the ranger station and information about the reserve. The best time to see the animals in action is early morning or late afternoon, therefore we recommend a safari that is several days long.

We arrange safaris to any park in Kenya, or Tanzania, all departing from Nairobi or Mombassa, to parks such as, Tsavo, Kenya's largest safari destination and one of the largest wildlife sanctuaries in the world! Tsavo West National Park is of recent volcanic activity and is covered in volcanic cones, rock outcrops and lava flows - the most spectacular being Shaitani.

On safari in Tsavo you'll see large herds of red elephants - not caused by too many Kenyan Tusker Beers, but by the thin red dust that is found in Tsavo. There are interesting geographical features in Tsavo including the Lugard Falls and the Mzima Springs, where an underwater observatory allows you to view the hippo, barbels and crocodiles. Mount Kilimanjaro dominates the western horizon and is a spectacular site from across the plains.

These sights and many more await your visit.
